

**UNIFILLER**  
LINXIS GROUP

Programmable pre-charge, suck back and reload speed

PRO 1000si

21 US gallon (79 liter) hopper

PLC touch screen control system with 100 recipes storage

PRO 2000si

Large opening for depositing products with large chunks

Clamps easily onto a conveyor for semi-automated production

## PRO SI SERVO SERIES

These servo machines have 6 programmable modes for depositing, spreading, liquid deposits and multi shots with a larger depositing range than pneumatic depositors. They are also modular — can be a standalone machine or integrated into a production line for automation. For more information visit [www.unifiller.com](http://www.unifiller.com).
